Vineyard

Vineyard Site:

The name Höchtemmel designates a very small vineyard on the Demmerkogel, with a South-South-East exposition and an altitude of up to 575 metres above sea level. Its soils are mainly composed of red schist. Its narrow terraces are inaccessible to vehicles, making manual vineyard work necessary. This single vineyard faces East and South and is protected by the Demmerkogel on the Western side. It is the birthplace of an incredibly expressive Weißburgunder.
