

BRUNELLO DI MONTALCINO VIGNA "POGGIO MOLINO AL VENTO" RISERVA 2018

DOCG Brunello di Montalcino, Riserva

Wine Description

Loads of stony, mineral notes on the nose. On the palate rich, yet savory rather than sweetly fruity. Impressive intensity and body with fresh tannins, but good fruit balance. A captivating and very distinctive Brunello. Give it a little time to soften.

Wine Type:	still wine red dry
Alcohol:	15 %
Acid:	5.6 g/l
Residual Sugar:	1.1 g/l
Certificates:	vegan, organic, bio-dynamic
Allergens:	sulfites
Drinking Temperature:	15 - 17 °C
Aging Potential:	20 years
Optimum Drinking Year:	2023 - 2042

Award

Winescritic:	94
Jancis Robinson:	17,5
James Suckling:	95

Vineyard

Origin:	Italy, Toscana
Quality grade:	DOCG Brunello di Montalcino
Site:	Vigna Molino al Vento
Normal Classification:	Riserva
Varietal:	Sangiovese 100 % 26 years 5000 plants/ha 3000 liter/ha
Sea Level:	450 - 500 m
Soil:	stony galestro limestone slate

Harvest and Maturing

Harvest:	handpicked 15 kg cask
Grape Sorting:	manual
Fermentation:	spontaneous with pied de cuve
Malolactic Fermentation:	yes

Fermentation Process:	délestage 1 - 3 x day Duration: 5 days pump over 1 x day Duration: 18 days
Maturing:	#1 35 % tonneau 500 L used barrel 12 month(s) #1 25 % tonneau 500 L new barrel 12 month(s) #1 40 % large wooden barrel 1500 L used barrel 12 month(s) #2 100 % large wooden barrel 3200 L used barrel 24 month(s) #3 100 % steel tank 3200 L 2 month(s)
Bottling:	natural cork Aug. 5, 2022

7 Dynamic Brunello Crus

Hayo Loacker, inspired by the vineyard classification of Burgundy, began 10 years ago to closely observe the terroir and the growth processes of the vines on Corte Pavone in Montalcino in order to produce very individual crus of Brunello di Montalcino. After elaborate measurements with highly sensitive infrared sensors, dynamic micro-parcelling was carried out throughout the entire estate in various growth zones and from these, seven individual single vineyards of Brunello were defined - the "7 DYNAMIC BRUNELLO CRUS". The crus are dynamic because the final selection of the grapes within the single vineyard sites is individually optimized with new measurements at the time of harvesting.

Curiosity

The name of the biggest cru vineyard "Molino al Vento" (en. Windmill) is due to the wind coming from the sea, which always rushes through the vines and most probably used to operate a windmill in this area.

Vintage 2018

Seasonal trend: Winter characterised by average rainfall and some snow, which made up for the considerable lack of water. The year began with temperatures above the seasonal average, which lasted until the end of February, when there was a sharp drop in temperatures with snowfall that affected the whole area, and minimum temperatures reaching almost -10°C. There was some light snowfall and rain during March with minimum temperatures below 0 and maximum temperatures above 15° at the end of the month. In April, the month in which the buds opened, rainfall was sporadic and minimum temperatures were around 5°C, increasing suddenly from the middle of the month. Frequent and abundant rainfall in May, accompanied by high temperatures, allowed optimal vegetative development. Flowering began at the end of the month. Thanks to the significant humidity accumulated in the soil, the vineyards were able to withstand the high temperatures of June and July. Fruit setting was completed throughout the whole area by mid-June. There was a slight delay in veraison, which began in the second half of July. August was characterised by weak, intermittent rainfall in the first three weeks and average temperatures of 25°C. Temperatures fell significantly in the last few days of the month, with minimum temperatures occasionally falling below 12°C. This led to uneven ripening, commencing from the end of August. There were some rainy days during the first week of September, with maximum temperatures of 30°C. The limited amount of rain on the grapes guaranteed good ripening. Heavy rainfall and temperatures of around 20°C from the second half of September forced the wineries to bring the Sangiovese harvest forward in order to ensure that the grapes were healthy. Product characteristics: the Sangiovese grapes were healthy. The average weight of the berries was medium-high and the wines produced were more elegant and refined, not particularly structured but with well-balanced tannins, evident primary aromas and clear scents. (Consorzio Brunello di Montalcino)
