BRUNELLO DI MONTALCINO "CAMPO MARZIO" 2021

DOCG Brunello di Montalcino

Wine Description

Star anise, cloves, blackberry - spicy and profound. Chocolaty finish on the palate, fine fruit sweetness and a hint of hazelnut. Lots of tannin, but perfectly integrated. A Brunello with body and character.

Wine Type: Still wine | red | dry

Alcohol: 15.5% Acid: 5.9 g/l Residual Sugar: 1.5 g/l

Certificates: vegan, organic, bio-dynamic

Allergens:sulfitesDrinking Temperature:15 - 17 °CAging Potential:20 yearsOptimum Drinking Year:2026 - 2045

12 month(s)

#1 | 30 % | tonneau | 500 L | used barrel | 12 month(s) #2 | 100 % | large wooden barrel | 2000 L | used barrel

24 month(s)

#3 | 100 % | steel tank | 2000 L | 12 month(s)

7 Dynamic Brunello Crus

Hayo Loacker, inspired by the vineyard classification of Burgundy, began 10 years ago to closely observe the terroir and the growth processes of the vines on Corte Pavone in Montalcino in order to produce very individual crus of Brunello di Montalcino. After elaborate measurements with highly sensitive infrared sensors, dynamic microparcelling was carried out throughout the entire estate in various growth zones and from these, seven individual single vineyards of Brunello were defined - the "7 DYNAMIC BRUNELLO CRUS". The crus are dynamic because the final selection of the grapes within the single vineyard sites is individually optimized with new measurements at the time of harvesting.

Curiosity

In ancient Rome Campo Marzio ("Champ de Mars") was an old battlefield and the scene of many great preparations for war. The Cru "Campo Marzio" is our little warrior, the vineyard with the oldest vines and longest history. A wine with staying power.

Vintage 2021

In August the total rainfall amounted was 26 mm, although some areas of the territory received up to 150 mm of water, concentrated in two events. This shows the variability of Montalcino and its microclimates. As far as temperatures are concerned, we had values of 39°C, concentrated between the 11th and 16th of August. On these dates, we also had an increase in minimum temperatures, which changed the vegetative balance, with the foliage and grapes beginning to suffer in some areas. The month of September had the lowest rainfall of the year, at 1.5 mm, with four days with maximum temperatures of >30°C, but with significant temperature fluctuations. Despite the lack of rainfall, this allowed the leaves to maintain an acceptable color and had a positive effect on the grapes and their aromatic components. October recorded an accumulated rainfall of 12.8 mm, with minimum temperatures of <7°C between the 9th and 14th of the month, improving the ripening of the grapes (in the later-ripening areas of the territory) with fluctuations in temperature of up to 15 degrees.
