THE LOCATION LOISERBERG is the coolest in Langenlois at up to 380 meters above sea level. It is windy and subject to extreme temperature differences. Apart from the loess layers, which become stronger towards the southeast, the soils consist of rocky brown soils over a mix of paragneiss, mica schist and amphibolite.

Weather / Climate

Vintage description:

The grape harvest started a little earlier than in the previous year, the main harvest took place between mid-September and the first week of October, the grapes were very ripe and healthy. Due to the heat, the berries were smaller, resulting in lower juice yields, but also more concentrated, denser and, in the case of the red wines, darker wines.
