

"Because of our experience that nature is the strongest force, we'd love to work with it. With the knowledge that the soil is the most intelligent part we deal with, we've decided to trust in it. We are convinced that the plants nourish our soil, therefore we let them grow. With these ideas and confidence we don't interact in the cellar, which causes that our wines transport the natural taste of the grape. These decisions we make by ourselves and let our personalities speak in our wines."

Strass
Kamptal
Kamptal is a cool climate region in the North East of Austria;
Strass has a very special microclimate because it has the first south faced slopes near the flat of the Danube. It's a unique combination of the very old mother rock of the Bohemian Massive and the particular influence of the Pannonian climate.
Strasser Weinberge is a protected name for „village wines“ which show you all characteristics of the variety and the village. Grapes are selected from the best vineyard sides in the village and express the diversity and complexity of the origin.
