

RauSchnitt Weine

Seebrünzla 2024

Origin: Austria, Burgenland
Quality grade: Landwein
Site Type: hilly land
Varietal: Zweigelt 90 % | 24 years | single guyot
Blauburger 10 % | 24 years | single guyot
Geographical
Orientation: south east
Soil: limestone

Weather / Climate

Vintage description:

2024 got off to a frosty start, and even Lake Neusiedl was frozen so thickly that it was possible to skate on it. Despite this, there was very little snow throughout the winter, and when it did fall, it was immediately gone again. A very warm February and an Easter that was already 25 degrees led to very early budding. However, a short but intense frost period severely affected vineyards at lower altitudes. Shortly afterward, in April, temperatures reached 30 degrees. At the end of May and in June, the first intensive period of rain caused explosive growth. From July to mid-August, extreme heat and complete drought dominated. However, the rainfall from June allowed the vines to continue to grow vigorously. The earliest harvest to date began on August 19. The start was hot and very dry, but renewed heavy rain and a sudden drop in temperature made the rest of the harvest more difficult. There was severe flooding in large parts of Austria - a 1,000-year flood occurred in and around Vienna. Overall, it was a year of extremes: exceptionally high rainfall, extreme drought, and record temperatures - on average, the warmest year since weather records began.

Cellar

Harvest: handpicked | August 19
Grape Sorting: manual
Sulfur Added: mash
Skin Contact: 4 hour(s)
Press: hydraulic
Fermentation: spontaneous
Pre Clarification: 19 hours
stainless steel tank | 600 L

Pet-Nat: Residual sugar at bottling - density 1005
on Aug. 25, 2024

Data

Wine Type:	Pet Nat rose brut
Alcohol:	11.5 %
Free Sulfur:	< 5 mg
Total Sulfur:	< 5 mg
PH Value:	3.32
Residual Sugar:	3 g/l
Acid:	5.6 g/l
Allergens:	sulfites
